Question 1: Number Series

What is the next number in the series: 2, 6, 12, 20, 30, ?

Solution:

Let's analyze the pattern:

$$- 2 = 1^2 + 1$$

$$- 6 = 2^2 + 2$$

$$- 12 = 3^2 + 3$$

$$- 20 = 4^2 + 4$$

Sample TCS Aptitude Questions and Detailed Answers

Below are some representative questions from each category, with detailed solutions to help you understand the approach.

Quantitative Aptitude

Question 1:

A train 150 meters long is moving at a speed of 45 km/hr. How much time will it take to cross a platform of length 350 meters?

Answer:

First, find the total distance to be covered:

Distance = Length of train + Length of platform = 150 + 350 = 500 meters.

Convert speed into meters per second:

Speed = 45 km/hr = $(45 \times 1000) / (60 \times 60) = 12.5$ m/sec.

Time = Distance / Speed = $500 / 12.5 = 40$ seconds.

Tip: Always convert units properly for calculation accuracy.

Question 2:

A shopkeeper offers a 15% discount on an article marked at Rs. 2000. If he still makes a profit of Rs. 200 on the sale, what is the cost price?

Answer:

Selling Price (SP) after discount = Marked Price - Discount

= $2000 - (15\% \text{ of } 2000) = 2000 - (0.15 \times 2000) = 2000 - 300 = \text{Rs. } 1700.$

Since profit = Rs. 200,

Cost Price (CP) = SP - Profit = $1700 - 200 = \text{Rs. } 1500.$

Logical Reasoning

Question 3:

Five friends A, B, C, D, and E are sitting in a straight line. A is to the right of B but to the left of C. D is to the right of C. Who is sitting in the middle?

Answer:

Let's analyze step-by-step:

- A is to the right of B ? B ? A
- A is to the left of C ? B ? A ? C
- D is to the right of C ? B ? A ? C ? D
- E's position isn't specified, but since only five friends are there, and D is to the right of C, the order must be B ? A ? C ? D, with E somewhere else.

Assuming E is not in the order, the middle position is C, as it's the third in the sequence.

Therefore, C is sitting in the middle.

Question 4:

Find the next number in the sequence: 2, 6, 12, 20, 30, ?

Answer:

Let's analyze the pattern:

- $2 = 1 \times 2$
- $6 = 2 \times 3$
- $12 = 3 \times 4$
- $20 = 4 \times 5$
- $30 = 5 \times 6$

The pattern is $n(n+1)$, where n starts from 1.

Next term: $6 \times 7 = 42$.

Thus, the answer is 42.
