Loops and Repetition

Loops allow children to repeat actions, making their projects more efficient and dynamic. For example, a sprite can dance by repeating a sequence of steps multiple times.

Conditional Statements

Introducing "if" and "else" blocks helps children understand decision-making within their programs. For example, a game can respond differently if a sprite touches another object.

Variables and Data

While more advanced, basic introduction to variables helps children understand storing and changing information, such as keeping score in a game.
