Sample abma Computer Engineering Questions and Solutions

Practicing actual sample questions is one of the most effective ways to prepare. Here are some typical questions you might encounter, along with strategies for solving them:

Question 1: Digital Logic Design

Q: Design a combinational circuit that takes three inputs (A, B, C) and outputs 1 when exactly two inputs are high, and 0 otherwise.

Solution Approach:

- Use a truth table to identify input combinations where exactly two inputs are high.
- Derive the Boolean expression for the output.
- Simplify using Boolean algebra or Karnaugh maps.
- Implement using logic gates.

Question 2: Microprocessor Architecture

Q: Explain the role of the program counter (PC) in a microprocessor and how it interacts with instruction fetching.

Solution Approach:

- Describe that the PC holds the memory address of the next instruction.
- During instruction fetch, the PC supplies this address to the memory unit.
- After fetching, the PC is updated to point to the subsequent instruction, either sequentially or via branch instructions.

Question 3: Data Structures

Q: Write a pseudocode to implement a stack using an array, including push and pop operations.

Solution Approach:

- Define an array and a variable top to keep track of the stack's size.
- For push: check for stack overflow, then insert the element at top+1 and increment top.
- For pop: check for underflow, then return the element at top and decrement top.

Question 4: Operating Systems

Q: What is deadlock in an operating system? Describe the necessary conditions for a deadlock to occur.

Solution Approach:

- Define deadlock as a situation where processes are waiting indefinitely for resources held by each other.
- List the four necessary conditions: Mutual exclusion, Hold and wait, No preemption, Circular wait.

Question 5: Networking

Q: Differentiate between TCP and UDP protocols.

Solution Approach:

- Explain that TCP is connection-oriented, reliable, and ensures ordered delivery.
- UDP is connectionless, faster, but does not guarantee delivery or order.
- Use cases: TCP for web browsing, UDP for streaming or gaming.
