QuestionAnswer What are the key differences between the equity method and consolidation in intermediate accounting? The equity method records investments where the investor has significant influence, typically 20-50% ownership, recognizing their share of net income. Consolidation involves combining all assets, liabilities, income, and expenses of a parent and its subsidiaries into a single set of financial statements, usually when the parent owns more than 50% of the subsidiary. How is impairment of long-lived assets accounted for in Intermediate Accounting II? Impairment is recognized when the carrying amount of an asset exceeds its recoverable amount. The impairment loss is measured as the difference between these two amounts and is recorded as an expense on the income statement, reducing the asset's book value accordingly. What are the main principles for recognizing revenue under the new revenue recognition standards? Revenue is recognized when control of the goods or services is transferred to the customer, in an amount that reflects the consideration expected in exchange. This involves identifying performance obligations, determining transaction prices, and recognizing revenue as performance obligations are satisfied. How do you account for lease transactions under the new lease accounting standards (ASC 842/IFRS 16)? Lessees are required to recognize most leases on the balance sheet as a right-of-use asset and a lease liability, measured at the present value of lease payments. Operating leases now also need to be capitalized, providing greater transparency of lease obligations. What is the process for accounting for income taxes in intermediate accounting, especially regarding deferred taxes? Income taxes are recognized based on the current tax payable and deferred tax assets and liabilities for temporary differences between financial statement and tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates and are adjusted for valuation allowances when necessary.
