Common Types of Non Verbal Reasoning Questions

Understanding the types of questions encountered in non-verbal reasoning tests is crucial to effective preparation. Here are the main categories:

1. Pattern Completion

This type involves identifying the missing part of a pattern based on the sequence of shapes, colors, or figures.

- Example: Completing a sequence of shapes where one element is missing.

2. Series and Sequences

Questions ask students to determine the next figure in a series based on the established pattern.

- Example: Recognizing the pattern in a sequence of figures and predicting the next one.

3. Odd One Out

Students must identify the figure or pattern that does not conform to the others.

- Example: Out of a group of shapes, find the one that doesn't match the rest.

4. Analogy and Classification

These questions involve grouping similar figures or establishing relationships between two figures.

- Example: Classify figures based on shape, size, or color.

5. Mirror and Water Images

Questions require identifying the mirror image or water (reflected) image of a given figure.

- Example: Choosing the correct reflection of a shape from multiple options.

6. Paper Folding and Cutting

These involve visualizing the outcome of folding a paper and making cuts to produce a specific pattern when unfolded.

- Example: Determining the pattern formed after folding and cutting.

7. Embedded Figures

Finding smaller figures hidden within larger ones.

- Example: Locating a specific shape embedded within a complex figure.
